

CHEMICALS

For Oilfield Industry

Drilling

- Viscosity Reducer
- Surfactants
- Iron Control Agent
- Cementing Surfactant

Stimulation

- Emulsifiers
- Dissolvers
- Mutual Solvent
- Viscoelastic Surfactant
- Acetic Acid and Methanol

Production

- H₂S Scavenger
- De-emulsifiers
- Solvents (Dissolvers)
- Asphaltene
- Corrosion Inhibitor

Tailor Made Solutions

- BaraDis™
- WBM filter cake removal
- OBM filter cake removal
- System Generating Nitrogen - SGN

TAILOR MADE SOLUTIONS

- **BaraDis™**

- BaraDis™ enhances well productivity by 50% by removing barite filter cake & protects company assets from severe erosion
- BaraDis™ is a soft BASIC stimulator compared to the aggressive acidic stimulator, acids can not dissolve barite or polymers
- It uses State of the Art Biotechnology, it leaves no negative environmental footprint and is totally biodegradable
- Environmental friendly

- **WBM Filter Cake Removal**

- The only available enzyme world wide that stays active at high temperature & is 100% biodegradable
- Proved +50% production enhancement
- Requires 4-8 HRs soaking time, while other available enzyme needs at least 16 HRs soaking time
- Environmentally friendly

- **OBM Filter Cake Removal - SGN**

- Removal of filter cake with heat, immiscible gas and energized formation
- Removal of any near wellbore emulsion
- Turbulent flow from gas agitates cakes and break down the particles of the cake
- Environmentally friendly

- **Other Application of the System Generating Nitrogen - SGN**

- Pipe line flushing in heavy oil production (SGN).
- Paraffin & wax removal in down hole & surface facilities (SGN + solvents)
- Asphaltene dispersing (SGN + solvents).
- Environmentally friendly

DRILLING

- **Viscosity reducer**

- Multiple applications
- Nontoxic, non-hazardous, non-flammable & 100% biodegradable

- **Cementing Surfactant**

- Non-ionic surfactants
- Fast-wetting, low odor & biodegradable

- **Iron Control Agent**

- Complexing with Fe^{3+} and Fe^{2+}
- High efficient iron ion chelating capability
- Biodegradable & environmental protective
- Prevents calcium sulfate precipitation from spent acid

STIMULATION:

● Iron Control Agent

- Complexing with Fe^{3+} and Fe^{2+}
- High efficient iron ion chelating capability
- Biodegradable & environmental protective
- Prevents calcium sulfate precipitation from spent acid

● Corrosion Inhibitor

- Environmentally friendly
- Water soluble
- Dispersible in heavy brines

● Mutual Solvent

- Dispersible in fresh water and brine
- Excellent compatibility characteristics
- For all light to medium hole clearing applications

● Viscoelastic Surfactant

- VES for acid diverting fluids
- Works in all acid systems 10 to 28% HCL
- Produce high viscosities up to 400 ° F (205 °C) in spent acid
- Completely breakable by crude oil & mutual solvents
- High viscosity high temperature completion fluid

STIMULATION:

- **Stimulation Surfactant**

- Non-ionic
- Fast wetting, low odor & biodegradable
- Alternative for large pre-flushes or long soaks

- **Acid Emulsifier**

- High efficiency
- Up to 350° F (175 °C)

- **Solvents (Dissolvers)**

- For both paraffin -based & asphaltene-based Crude Oil
- Competitive with xylene with high flash point
- Viscosity reducing solvent
- Multiple applications
- Nontoxic, non-hazardous, non-flammable & 100% biodegradable

PRODUCTION:

● H₂S Scavenger

- Water base & oil base
- Liquid & gaseous media
- Immediate reaction
- Results in non-hazardous atomic Sulphur

● De-emulsifier

- Eco-friendly solvent & degreaser
- Multiple applications
- Nontoxic, non-hazardous, non-flammable & 100% biodegradable

● Solvents (Dissolvers)

- For both paraffin -based & asphaltene-based Crude Oil
- Competitive with xylene with high flash point
- Viscosity reducing solvent
- Multiple applications
- Nontoxic, non-hazardous, non-flammable & 100% biodegradable

● Corrosion Inhibitor

- Environmentally friendly
- Water soluble
- Dispersible in heavy brines

● Asphaltene Inhibitor

- For asphaltene deposition problems in production lines and systems
- Competitive costs
- Customized as per client crude characteristics

ALTech GROUP have a global footprint

- Sales Office and Registered Entity
- Sales Representation

- Manufacturing Plant
- Warehouse (upcoming)
